

Our history started more than half a century ago, in 1961, and from the beginning up to nowadays Metalfar has become a leader manufacturer of flanges, well known and appreciated worldwide.

Our products have been utilized throughout all over the globe in the construction of oil and gas pipeline and water treatment plants. Today we can claim a truly international market for our products, as we export a large proportion of our production throughout the world - from the Americas to Africa, the Middle East and Southeast Asia, as well as Europe.

Located in the north of Italy, near Milan, Metalfar has premises extending over 600.000 square feet, of which some 300.000 are covered, producing carbon, alloy and stainless material to all grades and standards. In addition to the primary activity of flange production, Metalfar manufacturer forged steel fittings, forged valves and custom pieces forged to the customer's drawing.

All dye and tooling equipment are made in-house to assure the highest consistency and quality in all our products. Thanks to large high quality raw material stock, we have a production capacity of 60.000 Tons a year.

Metalfar is conscious of the necessity to continuously update and improve its machinery, in order to maintain the highest level of production and competitiveness.

Metalfar is focused on the customer satisfaction entirely; the efficient use of modern technology, combined with a rigorous production and inspection system, ensures a reliable delivery performance and a guaranteed quality of product.

Our Quality Control System is UNI EN ISO 9001:2015 approved.

The continuous research and attention to environmental problems has pushed Metalfar to regulate its activities in accordance with the latest regulations. Metalfar achieved recently ISO 14001:2015 certification. Moreover we are also Norsok, PED, PER/UNKA, Lloyd's Register and AD 2000-Merkblatt W 0 approved.

An internal laboratory is equipped for the main chemical and mechanical tests in line with automatic machines for spectrometric tests. Inside a tooling also allows the self-sufficiency in the management of the park and molds in the programming support of the production lines.

Our warehouse stocks over 1 million pieces in all sizes and grades of material and our packing and shipping department ensures that all products are prepared in such a manner that provides for proper protection of finished products.

Metalfar's range of products includes all main types of forged steel flanges, like Welding Neck, Slip On, Blind, Screwed, Socket Weld, Lap Joint, Reducing, Orifice Flanges and Long Welding Neck.

Our production covers all major dimensional standards, as ANSI B16.5 (150 - 300 - 400 - 600 - 900 - 1500 - 2500 lbs), ASME B16.47, BS 3293, DIN, AWWA, UNI EN, ISO.

In addition to the primary activity of flanges production, Metalfar manufactures other types of products, such as Stub Ends, Spectacle Blinds, Ring Spacers, Single Blinds and Drip Rings.

We have a wide variety of raw material, all coming from Italy and Western Europe, that allows Metalfar to meet all types of requests. We produce our products in ASTM A105 - A350LF2 A182 Austenitic grades and ferrite grades, Nickel, Cupro Nickel, Nickel - Chromium Alloy.
